Summary

Business Analyst with 2+ years of experience across analytics and consulting. I hold a Master's degree in Quantitative Management from Duke University, US. I turn raw data into insights and recommendations that drive decision-making. My skill-set includes SQL, Python, Power BI, Tableau, Claude Code, n8n, and Excel.

Work Experience

Techmentee Inc. **Jul 2025 – Jun 2026**
Business Analyst *Vienna, US*

- Deployed Power BI dashboards across 5 channels, integrating key performance metrics into a centralized reporting framework and **cutting reporting cycles by 41.2%** and giving leadership one view of audience behavior trends
- Analyzed cross-channel engagement data in SQL and Excel to isolate high-performing content segments, driving a **14% increase in CTR**
- Synthesized 1,000+ user survey responses via frequency analysis to surface actionable customer insights, directly shaping outreach strategy and audience targeting decisions

Los Angeles Football Club **Feb 2025 – May 2025**
Business Analyst *Durham, US*

- Cleaned and engineered features on 900K+ ticket records using SQL and Python, **improving data quality by 29%** and producing a model-ready dataset for predictive analysis
- Developed a Random Forest machine learning classification model in Python to predict ticket scan likelihood with 93% accuracy, informing an oversell strategy projected to **drop no-show rates by 15%**
- Structured a two-tier oversell model using attendance patterns and ticket utilization data, **raising attendance by 18.1%** and driving **$70.4M ARR**

Duke Advanced Degree Consulting Club **Jan 2025 – May 2025**
Business Consultant *Durham, US*

- Conducted competitive benchmarking and customer segmentation in Excel across market verticals, uncovering a **$40M revenue opportunity** that shaped GTM strategy for a Fortune 250 client
- Built DCF and TAM models to size addressable markets and forecast incremental revenue, projecting **$80M in portfolio-wide sales** growth to guide market entry priorities
- Presented executive presentations, translating complex analytical findings into clear strategic narrative insights through data-driven storytelling, supported by model and KPI analysis

RecoTree Technology Solutions PVT. LTD **Jun 2023 – May 2024**
Data Analyst *Chennai, India*

- Performed EDA on inventory logs using SQL and Python, identifying supply chain inefficiencies and **reducing supply chain order delays by 8.4%**
- Executed checkout A/B tests, **increasing conversions by 14%** and engagement by **23.6%**, while automating Tableau dashboards to **cut weekly reporting time by 30%**

Technical Skills & Certifications

Data Analysis & Analytics	SQL (CTEs, Window Functions), Python (Pandas, NumPy), Exploratory Data Analysis (EDA), KPI Tracking, Statistical Analysis, Forecasting, A/B Testing, ETL, Data Modeling, Data Governance
Business Intelligence & Visualization	Power BI (DAX, Power Query), Tableau, Excel (Power Query, Pivot Tables, VLOOKUP)
Other Skills	Machine Learning, AI Tools (Claude Code), n8n Automations, Natural Language Processing
Business & Strategy Analysis	Market Research, Competitive Analysis, Financial & Business Modeling (Forecasting, DCF, CLV), Cost-Benefit Analysis, ROI Calculation, SWOT & PESTLE Analysis
Certifications	Claude Code 101 (Claude Academy), Google Data Analytics Professional Certification (Coursera)

Education

Duke University, The Fuqua School of Business **May 2025**
MS in Quantitative Management: Business Analytics *Durham, US*
Awards: Merit Scholarship; selected Admission Ambassador and Duke Innovation & Entrepreneurship Ambassador

Anna University, Easwari Engineering College **Jun 2024**
Bachelor of Engineering, Mechanical Engineering *Chennai, India*
Awards: Gold Medalist, Academic Excellence Award; Elected Vice-President, Society of Mechanical Engineers

Technical Projects

Driving User Insights and Retention for Dognition *(SQL, Data Modeling).* Modeled and normalized a six-table relational database, improving data integrity and boosting customer engagement by 10% by using ERD+, advanced SQL queries, and exploratory analysis to uncover churn and lifecycle patterns.

Optimizing Healthcare Operations with MediTrack *(Tableau).* Built an interactive Tableau dashboard for patient visits, resource utilization, ICD-10, and prescription trends, reducing reporting time by 40% and improving care visibility and staffing decisions, by automating data aggregation and forecasting to predict seasonal demand.
